DETAILED ACTION

Allowable Subject Matter

1. Claims 1-4 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art does not teach the vehicle steering system as recited in claim 1, which includes an environmental condition detecting unit which detects environmental-condition in a rear and on both sides of the vehicle. The vehicle steering system also includes a decision unit, which decides whether an object approaching the vehicle from behind exists and whether the action of steering toward the side of the vehicle can be taken on the basis of the results detected by the environmental-condition detecting unit. The vehicle steering system further includes a control unit which forces a steering actuator to operate on the basis of the result decided by the decision unit irrespective of the operation of the steering unit. This recitation, in combination with the rest of the recited elements, clearly defines over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yasui discloses an adaptive steering control system, Wand et al. discloses an electric steering gear, Abe et al. disclose a vehicle operation assist control system, Kellogg discloses a steer control system for material handling vehicles.
